## How it works.

We will be sending home a booklet for your child to practise at home. Students should only practise the list they are working on or lists before the list they are working on.

To further develop this knowledge, please follow the STEPS below with your child.

Step 1 • Ask your child to read each word on the sheet.  
• Assist, if necessary.

Step 2 • Ask your child to read through the sheet saying the words.  
• Praise your child for their effort.

Step 3 • Once your child can easily read the words on the sheet, have them start practising writing each word.  
• Read each word to your child and have them write it on a piece of paper or in a book.  
• Assist if necessary

When you think your child can competently read and write each word on the sheet please sign it and return to your teacher. Students will be tested once a week only. Students will not be given a new word list unless they can read and write ALL words correctly. Practising the sheet each night should assist with automatic recognition and writing of high frequency sight words. Children won't usually learn sight words just by seeing them once. Repetition is the key! Try to make practice of sight words regular, short and fun.

Thank you for your support and interest in your child's learning.
